

Raw Pet Health Videos

Price: \$149.95 CAD

Short Description

20 Hours of Education

You will get an email giving you access to your videos within 1 business day of your purchase.

Featuring

- **Dr. Ian Billinghurst**
- **Dr. Robert Silver**
- **Dr. Peter Dobias**
- **Dr. Marty Goldstein**

Description

The videos are in the order they were presented at the conference

Introduction by Dennis Hagel

Dr. Billinghurst

- Back to Basics Raw Nutrition
- The REAL Meaning of RAW
- The major problems associated with fake food

- The irrelevance of AAFCO to RAW
- Evolutionary Nutrition for the dog and cat

Dr. Silver

- Medical Cannabis: What Every Veterinarian Needs to Know. Canada will become Federally legal for the use of recreational cannabis summer of 2018, and has had medical marijuana legislation for many years. Canada is also the second largest grower of hemp globally. For these reasons, it behooves Canadian veterinarians to learn more about this fascinating herb and the endocannabinoid system it serves in all animals, as primitive as the Sea Squirt and as complex as the human being.

Dr. Dobias

- A Complete diet for dogs - an achievable goal or a myth?

Dr. Goldstein

- A general overview of the trends I have witnessed and literally how bad “Health” has gotten in our domesticated animals
- Contributing factors as to why.
- In relationship to health, what is disease? What is its purpose

Dr. Billinghurst

- Constructing RAW prescription diets for various conditions
- The Role of pathogens in RAW Food — an essential part of the Microbiome
- Balanced calcium & Phosphorus — simple — not difficult!
- Q&A

Dr. Silver

- Cannabis for Cancer? What if cannabis cured cancer? Well from all indications, reports from the field and research studies it appears that cannabis can treat cancer, many times very successfully. Research supporting the anti-neoplastic effect of cannabis and including case reports from the field will be presented in this fascinating class.
- Q&A

Dr. Goldstein

- In depth synopsis of vaccinations and appropriate practices
- Overview of the pet food industry
- Q&A

Dr. Goldstein

- Supplements—what are they or what should they be. Are they needed, even for healthy pets. How to choose
- Cancer—what it is—a basic understanding and cause. How to address it, integratively. How to prevent it.
- On a higher level—the human animal bond
- Q&A

Dr. Silver

- Integrative Oncology: Blending the Best of Conventional and Integrative Medicine to Produce the Very Best Outcomes for Your Cancer Patients. Conventional medicine has made huge strides in developing less toxic, more effective therapeutics for veterinary cancer patients. Unfortunately, not all patients will respond to these therapies. Many pet guardians can't afford these therapies or won't accept chemotherapy or radiation. Integrative Oncology involves building a team that includes oncologists(s), integrative and conventional veterinarians, and other caregivers such as Pet Hospice workers and grief therapies to provide a broad-spectrum of care for the veterinary cancer patient.

Dr. Billinghurst

- The Cancer Industry – a battle we are losing and they are winning
- Our current tools in the fight against cancer
- Smart drugs — why they must ultimately fail
- Cancer — what we do know and what we have got completely wrong
- Understanding cancer from an evolutionary perspective
- Q&A

Dr. Goldstein

- Q&A

Dr. Dobias

- Essentials of nutritional therapy for better health and longevity

Dr. Billinghamurst

- Cancer — it's a mitochondrial and metabolic disease
- Cancer's Achilles' heel — ketogenesis and calorie restriction
- The role of supplements and oxygen
- Ketogenesis and calorie restriction — the must use modalities — no matter what else we do.
- Q&A
