

# Joint Rejuv

**Price: \$33.95 CAD**

## Short Description

Joint Rejuv supports healthy joint function, helps minimize joint pain, rebuilds cartilage and maintains the structural integrity of joints. After a few weeks to a month on Joint Rejuv, your pet should display noticeable improvement in comfort, mobility and attitude. [Click on the image for more details.](#)

## Description

Prescription pain relievers are the chief medical treatment for joint conditions in pets but nearly all of them have side effects and do nothing to halt the advance of arthritis. Joint Rejuv supports healthy joint function, helps minimize joint pain, rebuilds cartilage, and maintains the structural integrity of joints. After a few weeks to a month on Joint Rejuv, your pet should display noticeable improvement in comfort, mobility, and attitude.

Joint Rejuv combines the benefits of glucosamine with the properties of chondroitin and other synergistic ingredients - all of which work together to provide an optimum joint formulation. Glucosamine is made up of glucose and an amino acid called 'glutamine', which is produced in the body to help manufacture specialized molecules called 'glycosaminoglycans' (GAGs). GAGs are important for the development of bone, tendons, ligaments, nails, hair, skin, and cartilage. Glucosamine is highly beneficial in protecting against degeneration of the joints and giving relief from the pain associated with arthritis. Chondroitin is a natural compound found in joints. In degenerative diseases such as arthritis, its presence

diminishes as cartilage erodes. It is thought to block the enzymes that can destroy cartilage tissue as well as promote water retention in the cartilage found in joints, making it more elastic.

**INGREDIENTS PER 1 TEASPOON (5 mL):**

|  |        |
|--|--------|
| D-Glucosamine Sulphate (Shellfish Exoskeletons)..... | 500 mg |
| D-Chondroitin Sulphate (Bovine Cartilage) .....      | 150 mg |
| Methylsulfonylmethane (MSM).....                     | 250 mg |
| Harpagophytum procumbens (Devil's Claw Root).....    | 20 mg  |
| Boswellia serrata (Frankincense Resin).....          | 10 mg  |
| Ledebouriella divaricata (Siler Root).....           | 10 mg  |

**Additional ingredients:** Purified water, citric acid, potassium sorbate, and Benzoic acid (buffered).

**Cautions:** Not for use in young, pregnant, and lactating animals, with impaired liver function, gastric/duodenal ulcers or diabetes. Not for use with other medications given simultaneously (may delay absorption). Do not exceed recommended dose. Do not use it if the security seal is broken.

**Directions by animal body weight:**

|                                |                               |
|--------------------------------|-------------------------------|
| 1-10 lbs   0.5-4.5 kg.....     | ½ teaspoon (2.5 mL) per day   |
| 11-20 lbs   5-9.1 kg.....      | 1 teaspoon (5 mL) per day     |
| 21-50 lbs   9.5-22.7 kg.....   | 1½ teaspoons (7.5 mL) per day |
| 51-100 lbs   23.2-45.5 kg..... | 2 teaspoons (10 mL) per day   |
| 100 lbs   45.5 kg.....         | 1 tablespoon (15 mL) per day  |

Syringe directly into the mouth for best results. Can be added to pet's food. For use in cats and dogs only.

Available in a 250ml flip-top bottle
